

Jackets are an ideal way to turn your barricades into high impact billboards. However most jackets are designed to fit a specific brand of barricade. If you do not know which barricade brand you have our Universal Jacket design is the answer. The universal design does not enclose the hook and loop fixtures on the ends of the barricade, so it fits any 8' (2.5m) barricade. The printable area on the jacket is the same as on a fitted design and it can be digitally printed in any number of colors. The full-length velcro bottom edge makes fitting on the barricade fast and easy.
