

The ProLux post features our ultra low-profile base giving this stanchion a stylish European look. With a leading edge of only 3/8" and an overall height of just 3/4" the low-profile base is designed to minimize trip hazard. This is ideal for high traffic locations and where child and wheel chair access must be accommodated. The base also features our unique full coverage floor protector that saves expensive flooring from scuff damage.

Low Profile Base

Minimal Trip Hazard
